

DAMBE.BET
FOR THE PEOPLE

DAMBE.BET

WHITE PAPER

1 FEBRUARY 2026

VERSION 1.2

1. EXECUTIVE SUMMARY

DAMBE.BET is a hybrid AI and blockchain-powered, real-money gaming platform delivering fast-paced 2.5D combat sports betting experiences designed for the mobile-first Nigerian market. The platform combines traditional betting mechanics with provably fair, RNG-driven outcomes, offering players the ability to wager using both stablecoins (USDT and USDC) and the \$DAMBE utility token.

The DAMBE.BET ecosystem is purpose-built to address the inefficiencies in predatory traditional 3D high-frequency virtual sports betting platforms (that have saturated the Nigerian market), including lack of transparency, slow settlement, limited accessibility, and extractive fee structures. By leveraging blockchain infrastructure, DAMBE.BET enables instant settlement, transparent fund flows, and a sustainable token economy tied directly to real gameplay activity.

DAMBE.BET does not rely on speculative token mechanics. Its economic design prioritizes long-term sustainability, regulatory pragmatism, and real user demand over short-term hype.

Our pro-player business models and gamification strategies are innovations that will disrupt the online gambling sector as we bridge entertainment and financial inclusion through gameplay.

2. PROBLEM STATEMENT

2.1 Limitations of Traditional 3D Virtual Sports Betting Platforms

Existing predatory practices of retail online Virtual Gaming and Betting platforms suffer from several structural issues:

- ▶ Opaque odds calculation and payout logic
- ▶ Slow withdrawals and settlement delays
- ▶ High fees and unfavorable player economics
- ▶ Centralized control over player funds

These issues are amplified in high-frequency betting formats, where speed, trust, and fairness are critical.

2.2 Limitations of web3 Gaming Models

Conversely, many web3 gaming and betting platforms fail due to:

- ▶ Over-reliance on speculative tokens
- ▶ Forced token usage for gameplay
- ▶ Inflationary emissions disconnected from real activity
- ▶ Complex DAO and governance structures unsuitable for mass adoption

DAMBE.BET is designed as a pragmatic alternative, blending the best of Web2 betting with innovative pro-player economics with web3 infrastructure advantages.

3. THE DAMBE.BET SOLUTION

DAMBE.BET delivers a high-frequency 1v1 combat betting game where players wager on simulated fights generated by provably fair random number generation (RNG). Each match completes approximately every three minutes, creating continuous engagement and repeat gameplay.

Key solution pillars include:

- ▶ Cryptocurrency betting: Players can bet using Stablecoins (BRC-20, TRC-20 and ERC-20) or native \$DAMBE token
- ▶ Provably fair outcomes: Transparent RNG logic
- ▶ Instant settlement: On-chain funds movement
- ▶ Optional token utility: \$DAMBE enhances gameplay but is not mandatory
- ▶ Mobile-first UX: User-friendly, and optimized for emerging markets
- ▶ Revolutionary Jackpot: Transparent contributions governed by proprietary algorithms, fair smart contracts, and RNG logic powered by Zero-Knowledge Proofs (ZKPs) Technology.

DAMBE.BET's design ensures accessibility for casual players while providing economic depth for high-volume participants.

4. PRODUCT OVERVIEW

4.1 Gameplay Mechanics

- ▶ Optimal mobile-native 2.5D stylized and animated combat simulations
- ▶ Pre-match betting window (~3 minutes)
- ▶ Fixed odds betting experience
- ▶ Automated settlement upon match completion

4.2 Betting Experience

Players may:

- ▶ Place bets quickly, intuitively, and effortlessly
- ▶ Place bets in USDT or USDC for stability
- ▶ Place bets in \$DAMBE token for enhanced rewards

DAMBE.BET betting offers incentives such as reduced fees, odds boosts, loyalty multipliers, and access to promotions.

4.3 Jackpot & Rewards

- ▶ Stake-based contributions for Progressive jackpots
- ▶ Bonus rewards tied to gameplay volume
- ▶ Streak-based and mission-based incentives
- ▶ Risk managed, liquidity on demand, insurance-backed jackpot

DAMBE.BET ZK-proofs based jackpot uses cryptographic proofs to ensure that jackpots are fair, transparent, and verifiable, while keeping participant identities private.

5. TECHNOLOGY ARCHITECTURE

5.1 Blockchain Infrastructure

DAMBE.BET will be deployed on an EVM-compatible blockchain, enabling:

- ▶ Smart contract-based wagering
- ▶ Transparent fund custody
- ▶ Automated payout logic

The architecture is designed to be blockchain-agnostic, allowing future deployments across multiple networks.

5.2 RNG & Fairness

- ▶ Secure RNG mechanisms
- ▶ Verifiable combat outcomes
- ▶ Audit-ready logic

5.3 Wallet & Payments

- ▶ Self-custody wallet integration
- ▶ Stablecoin-based settlement option
- ▶ On-chain accounting with off-chain UX optimization

6. MARKET OPPORTUNITY

6.1 Target Markets

DAMBE.BET is primarily targeting the Nigerian market, but will also focus on high-growth, mobile-first regions to supply our B2B white-label offerings including:

- ▶ Other African countries
- ▶ Southeast Asia
- ▶ Middle East

These markets demonstrate:

- ▶ High engagement with sports betting
- ▶ Growing stablecoin adoption
- ▶ Limited access to efficient payment rails

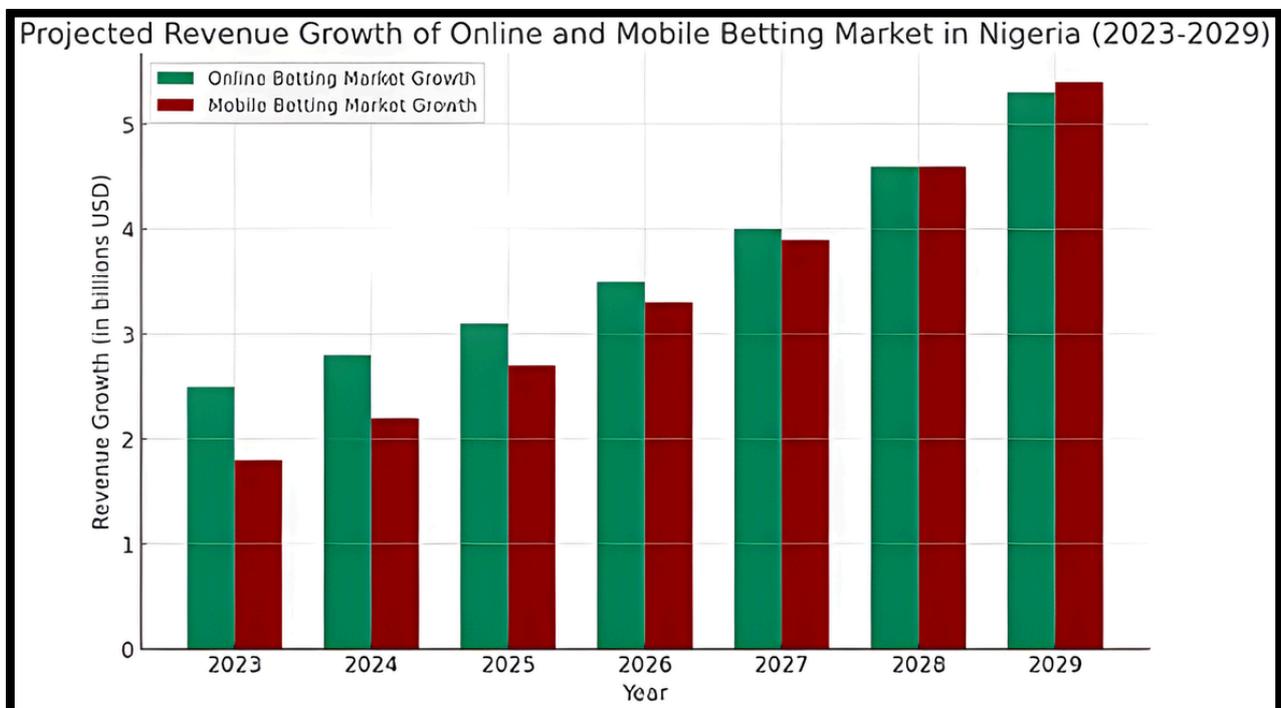

6.2 Market Size

The global online betting market exceeds hundreds of billions of dollars annually, with emerging markets representing the fastest-growing segment. Nigeria's online gambling industry is expanding rapidly, driven by mobile technology, a young population (over 60% under 30), and increasing internet penetration. 70% of the market, are male between the ages of 18-34, and 30% female players. Revenue projections for 2025 range from \$500 million to \$3.63 billion, with sports betting alone expected to hit \$590 million and grow at a 4.61% CAGR through 2029.

DAMBE.BET targets a niche intersection of:

- ▶ High-frequency betting
- ▶ Mobile gaming
- ▶ Crypto-native payments
- ▶ 24/7 availability, short cycles
- ▶ Innovative and Disruptive DeFi Financial Inclusion mechanisms for the community

7. BUSINESS MODEL & REVENUE STREAMS

DAMBE.BET generates revenue primarily through stablecoin-based betting activity but also from \$DAMBE token wagers, ensuring real cash flow independent of token price.

7.1 Revenue Sources

- ▶ Betting fees
- ▶ Jackpot contributions
- ▶ Promotional campaigns
- ▶ Yield-based staking and lending strategies

7.2 Token-Linked Value Capture

DAMBE.BET token demand is driven by:

- ▶ Fee reductions
- ▶ Reward eligibility
- ▶ Odds enhancements
- ▶ Gameplay volume incentives

Token value is therefore tied to platform usage rather than speculation.

8. TOKENOMICS & FUNDING MODEL (PINKSALE-BASED PRESALE)

8.1 Token Overview

The Project token (“\$DAMBE”) is designed as a long-term secure utility and settlement asset option powering payments, access rights, and economic coordination across the ecosystem. The tokenomics model prioritizes capital efficiency, deep on-chain liquidity, disciplined treasury usage, aggressive community adoption, controlled emissions, and long-term sustainability over short-term speculative inflation.

The ecosystem operates with a fixed total supply of 1,000,000,000 tokens, with no minting after deployment.

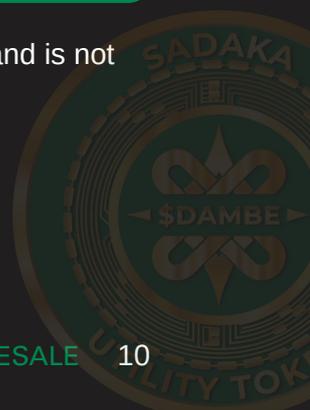

The fundraising model is engineered to support 18+ months of operational runway, institutional-grade liquidity depth, and Nigeria-first community adoption.

Additional funds raised above the soft cap are allocated to liquidity depth, ecosystem incentives, regulatory readiness, and market expansion to ensure long-term sustainability.

The project is fully viable at the soft cap, scalable at mid-raise, and category-leading at the hard cap.

- ▶ **Token Name:** DAMBE
- ▶ **Token Type:** Utility Token
- ▶ **Total Fixed Non-inflationary Supply:** 1,000,000,000 DAMBE
- ▶ **Decimals:** 18
- ▶ **Network:** BNB Chain (primary), multi-chain expansion planned
- ▶ **Primary Utilities:** Betting incentives, fee reductions, rewards, jackpots, loyalty, financial inclusion initiatives, and ecosystem participation

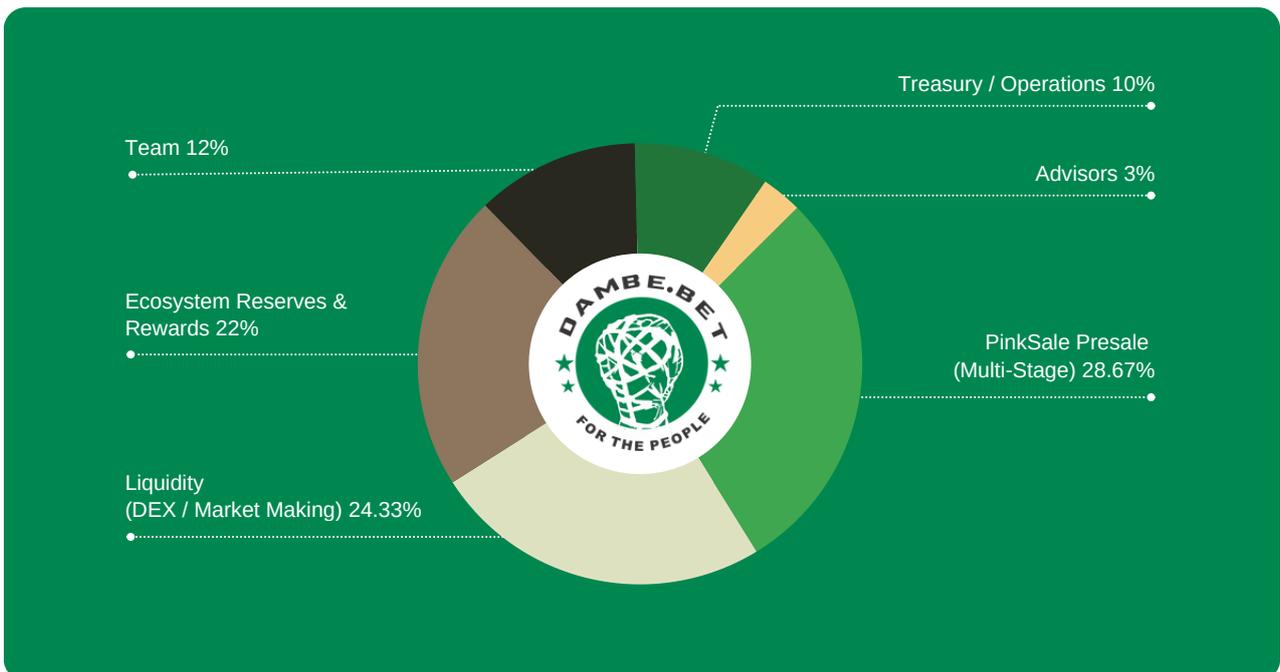

\$DAMBE is a pure utility token. It confers no ownership, governance, or profit rights and is not intended to represent securities, equity, or investment contracts.

8.2 Token Allocation

Category	%	Tokens
PinkSale Presale	28.67%	286,666,667
Liquidity (DEX / Market Making)	24.33%	243,333,333
Treasury / Operations	10%	100,000,000
Ecosystem Reserves & Rewards	22%	220,000,000
Team (Locked + Linear Vesting)	12%	120,000,000
Advisors	3%	30,000,000
Total Supply	100%	1,000,000,000

A robust and community-oriented structure with a strategic 75% of the total supply being allocated to players, token investors, liquidity, and ecosystem incentives. Only 25% is reserved for the team, treasury and advisors.

8.3 PinkSale Presale Structure

DAMBE.BET will utilize PinkSale's transparent smart contract presale infrastructure to conduct a Presale fundraising process designed to:

- ▶ Maximize decentralization & Security
- ▶ Prevent single-investor and whale dominance
- ▶ Protect early participants
- ▶ Establish a healthy post-launch market

AUDITED BY 
BlockSAFU

Presale Structure (PinkSale)

- ▶ Allocation: 28.67% of total supply
- ▶ Tokens: 286,666,667 DAMBE
- ▶ Soft Cap: \$1,800,000 USDT
- ▶ Hard Cap: \$3,400,000 USDT
- ▶ Price: \$0.01186 USDT per TOKEN

Buy-in Structure:

- ▶ Min buy: \$15 USDT
- ▶ Max buy: \$1,000 USDT

Vesting: Presale Token Vesting

Tokens purchased during the public PinkSale presale are **fully unlocked at Token Generation Event (TGE)**, with **no vesting period applied**. This configuration is required to support automated DEX liquidity provisioning and to ensure transparent, fair price discovery at launch.

PinkSale

The DAMBE.BET Presale will be conducted as fully KYC'd and Audited verified by PinkSale

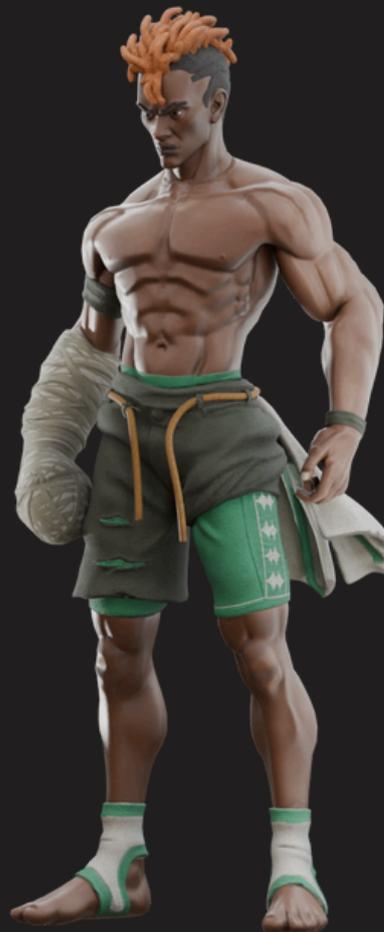

PinkSale's refund, soft-cap, and hard-cap mechanisms ensure participant protection and transparency.

8.4 Liquidity Generation Event (LGE)

- ▶ Initial DEX Liquidity sourced from presale proceeds
- ▶ Liquidity tokens locked via PinkSale (365 days)
- ▶ Liquidity depth calibrated to avoid excessive volatility

Liquidity is not recycled for speculative yield but reserved for stable market operations.

Liquidity generated at TGE will be paired with USDT and locked via a third-party smart contract for a minimum of 365 days. During this period, LP tokens cannot be withdrawn, ensuring market stability and protecting token holders from liquidity removal.

8.5 Team Vesting

- ▶ Allocation: 12% (120,000,000 DAMBE)
- ▶ TGE Release: 0%
- ▶ Cliff: 9 months
- ▶ Vesting: 48 months
- ▶ Unlocks: Linear, monthly

This structure ensures long-term alignment and prevents insider dumping. We are all about **BUILDING** and **INVESTING** in the **COMMUNITY** and developing innovative solutions for long-term sustainability!

8.6 Token Utility & Value Sustainability

DAMBE demand is driven by:

- ▶ Reduced betting fees
- ▶ Odds boosts
- ▶ Eligibility for jackpots
- ▶ Volume mining rewards
- ▶ Loyalty tiers
- ▶ Financial Inclusion initiatives - Adashe, Ajo, Esusu + Small Business Lending

Supply reduction mechanisms include:

- ▶ Fee-based token sinks
- ▶ Jackpot participation requirements
- ▶ Programmatic buybacks (from platform revenue)

Token value is tied to real betting volume, not speculation.

8.7 Token Utility & Value Sustainability

Metric	Value
Total Presale Allocation	286,666,667 TOKEN (28.67%)
Total Presale Hard Cap	\$3,400,000 USDT
Total Presale Soft Cap	\$1,800,000 USDT
Presale Price	\$0.01186
Initial DEX Listing Price	\$0.01186
Team	12% (48-months linear vesting)

9. ROADMAP

PHASE 1: FOUNDATION (MONTHS 0–3)

- PinkSale presale (PinkSale KYC, 15 AMAs planned with Promoter and Community Rewards - Immediate & Vesting)
- Smart contract audits (BlockSAFU Audit Completed - 100% Trust Score)
- DEX listing

PHASE 2: LAUNCH (MONTHS 4–6)

- Core platform MVP, Mobile-first beta
- Licensing Acquisition
- Payment Partnerships

PHASE 3: EXPANSION (MONTHS 7–12)

- CEX Listings
- Initial Jackpot activation
- Advanced loyalty mechanics
- Adashe, Ajo, Esusu + Small Business Lending Models completed

PHASE 4: SCALE (YEAR 2+)

- Multi-chain deployment
- Institutional White-label B2B integrations
- New game formats

10. RISK FACTORS

Participation in DAMBE involves inherent risks including:

- ▶ Market volatility
- ▶ Regulatory uncertainty
- ▶ Technology risks
- ▶ Liquidity fluctuations
- ▶ User adoption risk

DAMBE.BET does not guarantee profits, price appreciation, or returns.

11. LEGAL & COMPLIANCE DISCLAIMERS

DAMBE tokens are utility tokens designed for use within the DAMBE.BET platform.

- ▶ DAMBE does not represent equity, securities, or investment contracts
- ▶ No dividends, profit-sharing, or governance rights are provided
- ▶ Participation may be restricted in certain jurisdictions

Users are responsible for complying with local laws and regulations.
